## PROFESSIONAL SUMMARY

Computer Science Engineering fresher (graduating May 2026) with hands-on experience in full-stack web development using Python programming and Generative AI. Skilled in data structures, algorithms and prompt engineering. Built real-world projects including a blockchain-based certificate system and an AI-powered chatbot. Seeking an Software Developer or Prompt Engineer role where I can contribute to scalable, production-ready applications.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, HTML5, CSS3, SQL

**Frameworks & Libraries:** MERN Stack (MongoDB, Express.js, React.js, Node.js), REST APIs, Bootstrap

**AI & Machine Learning:** Generative AI, Prompt Engineering, LLM tools (ChatGPT, Gemini, DeepSeek, Claude)

**Developer Tools:** Git, GitHub, VS Code, Raspberry Pi, VS Code

**Soft Skills:** Team Collaboration, Problem-Solving, Leadership, Analytical Thinking, Presentation Skills

## EXPERIENCE

### Associate Intern — *Shanrohi Technologies (Pi Ads), Hyderabad, India*

May 2023 – Jun 2023

- Designed and deployed a Raspberry Pi-based digital advertising system that automated remote content delivery, replacing manual on-site advertisement updates for ~5 client locations.
- Developed a full-stack web application (HTML/CSS/JS + backend API) enabling clients to remotely upload and schedule advertisement videos, reducing operational overhead by eliminating on-site visits.
- Implemented scripted content scheduling logic that improved system automation and allowed unattended 24/7 ad rotation across deployed devices.

## PROJECTS

### Digital Certificate Management System [GitHub ↗](#)

Tech Stack: React.js, Node.js, MongoDB, Blockchain, QR Code API

- Led a team to architect and develop a blockchain-based certificate management system, ensuring tamper-proof issuance and storage of digital credentials.
- Implemented QR code-based certificate verification to enable instant authenticity checks and prevent certificate fraud.
- Designed the end-to-end workflow from certificate generation to verification, integrating blockchain immutability with a user-friendly interface.

### AI Career Guidance Chatbot — Google Hackathon [GitHub ↗](#)

Tech Stack: Python, LLM APIs (Gemini/OpenAI), Prompt Engineering, REST APIs

- Built an AI-powered career advisory chatbot that delivers personalized skill recommendations and career roadmaps based on user input.
- Leveraged large language model (LLM) APIs and prompt engineering techniques to generate context-aware, actionable career guidance.
- Developed and submitted as part of a Google Hackathon, demonstrating ability to deliver an end-to-end AI product under time constraints.

### Personal Portfolio Website [GitHub ↗](#)

Tech Stack: HTML5, CSS3, JavaScript, React

- Designed and developed a fully responsive portfolio website using HTML5, CSS3, and vanilla JavaScript, showcasing projects, skills, and achievements.
- Ensured cross-device and cross-browser compatibility with a mobile-first responsive design approach.

## EDUCATION

### B. tech in Computer Science & Engineering

May 2026

Holy Mary Institute of Technology and Science, Telangana | GPA: 7.0

### Intermediate (MPC)

May 2022

Narayana Junior College, Telangana | GPA: 6.9

### High School (SSC)

March 2020

New Little Lilly High School, Telangana | GPA: 9.2

## ACTIVITIES & INTERESTS

- Active participant in hackathons and coding competitions, including a Google-hosted hackathon where I built and submitted a functional AI product.
- Interested in AI, Web3, and open-source software development; regularly follow engineering blogs and emerging LLM research.
- Personal interests include music production and engaging with the local tech community.
