PROFESSIONAL SUMMARY

Full stack developer and 2026 B.Tech CSE graduate, currently interning at an ed-tech company where I build and ship a production Learning Management System used by teachers and students. Hands-on with React, Node.js, Python (Flask), MongoDB and SQL, plus LLM APIs, prompt engineering and scikit-learn. Built secure, AI-powered applications end to end from authentication and fraud detection to Docker deployment. Seeking a Software Developer / Full Stack Engineer role.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: React.js, React Router, Responsive UI

Backend: Node.js, Flask, REST APIs, JWT Authentication, MFA / OTP, bcrypt

Databases: MongoDB, SQL

AI / ML: Generative AI, LLM APIs (Gemini, OpenAI), Prompt Engineering, scikit-learn (Random Forest)

Tools & DevOps: Git, GitHub, Docker, VS Code, Google Antigravity, Tauri (desktop apps)

EXPERIENCE

Full Stack Developer Intern — Super Teacher Edu Reforms Pvt. Ltd., Hyderabad ***Jun 2026 – Present***

- Designed, developed and deployed a Learning Management System (LMS) web portal that lets teachers create and run assessments and lets students follow courses, read ebooks and take tests online.
- Building a Windows desktop version of the LMS with Tauri + React, adding encrypted ebooks that students can read offline, written to a formal product requirements document (PRD).
- Adapting the LMS into an Android app for Google Play Store release, reusing the existing web codebase.
- Implemented scripted content-scheduling logic that automated ad rotation, enabling unattended 24/7 operation across deployed display devices.

PROJECTS

Digital Certificate Management System GitHub ↗ *Team Lead*

Tech Stack: React.js, Node.js, MongoDB, Blockchain, QR Code API

- Led a team to design and build a blockchain-backed system for tamper-proof issuing and storing of digital certificates.
- Implemented QR-code verification so anyone can confirm a certificate's authenticity instantly, preventing forgery

AI Career Guidance Chatbot GitHub ↗

Tech Stack: Python, Gemini / OpenAI APIs, Prompt Engineering, REST APIs

- Built an LLM-powered career advisor that generates personalised skill recommendations and career roadmaps from user input.
- Leveraged large language model (LLM) APIs and prompt engineering techniques to generate context-aware, actionable career guidance.
- Developed and submitted as part of a Google Hackathon, demonstrating ability to deliver an end-to-end AI product under time constraints.

Online Voting System with AI Fraud Detection GitHub ↗

Tech Stack: React, Flask, MongoDB, scikit-learn, JWT, Docker

- Built a full-stack election platform with role-based access (Voter / Admin), JWT auth, email-OTP multi-factor login, bcrypt password hashing and photo-based identity verification.
- Designed prompts for context-aware, actionable answers; shipped a working end-to-end product within the hackathon deadline.

EDUCATION

B. Tech in Computer Science & Engineering *May 2026*

Holy Mary Institute of Technology and Science, Telangana

ACHIEVEMENTS & ACTIVITIES

- Built and submitted a functional AI product at a Google-hosted hackathon; regular participant in hackathons and coding contests
- Participant, DEV Hacktoberfest 2026 Open-Source AI Challenge _ built a privacy-first invoice and receipt sorter web app for freelancers.
- Interests: Generative AI, Web3, open-source software, music production and the local tech community.
